Product Description

HCPC E2604 (22" or greater)

The Journey™ Bariatric cushion has 3 layers for comfort, support, and durability. Visco-elastic memory foam provides the primary layer of comfort, pressure redistribution, and softness. The 2-layer base is comprised of high-resiliency foam, which provides support and added durability to prevent bottoming out under the most demanding weight situations. The Journey™ Bariatric cushion offers pressure redistribution for medium-risk individuals or those with skin breakdown. Includes a 4-way stretch, incontinent-resistant cover with non-skid bottom. Extra covers available. See Keen covers page 17.
