

Hard Back Insert

Wheelchair Cushion

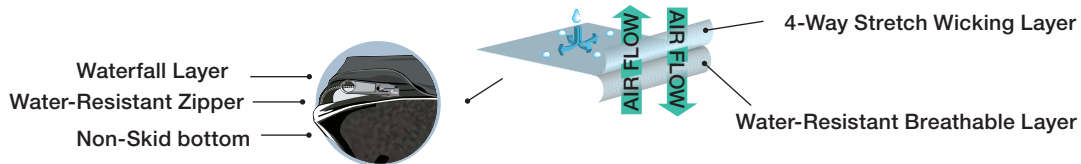

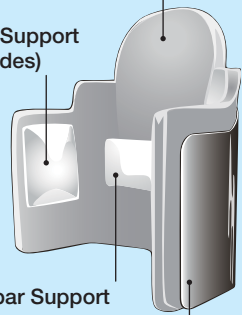

- ↳ Medium positioning
- ↳ Lateral pelvic stabilization
- ↳ Lumbar support
- ↳ Helps correct slung upholstery

Visco-Elastic Memory Foam

Lateral Support (both sides)

Lumbar Support

Flexing Aluminum Support

Product Description

HCPC E2611

The Hard Back Insert is designed to provide posterior lateral pelvic stabilization along with lumbar support. It has a flexible aluminum core surrounded by visco-elastic memory foam. Often used for mild leaning because it is designed to “hug” the individual. With no hardware components, this back support is also a quick solution to manual wheelchairs with slung upholstery. Attaches to the wheelchair with four adjustable anchor straps. Includes a 4-way stretch, incontinent-resistant cover with non-skid bottom. Extra covers available.
