

Leg Arrow

Leg Flotation Cushion

- Use in a variety of positions
- Replaces ineffective pillows
- Moisture-resistant, 4-way stretch cover included

Visco-Elastic Memory Foam

4-Way Stretch Wicking Layer

Water-Resistant Breathable Layer

Product Description

Ideal for individuals at risk for pressure wounds or individuals in need of better hip and leg positioning, the Liberty™ Leg Arrow cushion is designed to offer comfort, positioning, and support of the lower extremities. Often used to replace ineffective pillows, this unique design can be used with individuals laying on their side, windswept in the bed or wheelchair, to isolate one heel for flotation, or as a wedge for individuals lying on their back. The memory foam core conforms to the individual, redistributing pressure from the knee to the ankle. The Leg Arrow can be used with all Liberty™ heel products for total lower extremity pressure redistribution and positioning. Includes a 4-way stretch, incontinent-resistant cover. Extra covers available.
