

# SanoAir Mattress

Alternating Low Air Loss Mattress

- Up to stage IV wounds
- 400lbs. weight limit
- Quick inflate and deflate CPR plug
- Heavy-duty 4-way stretch cover
- Unique 1 in 3 true alternating low air loss therapy
- Adjustable cycle time
- 10 pressure settings

Very frail 69-year-old female on comfort care, dependant for all ADs. Hoyer lift. Developed 2 new wounds, 2 stage II's and stage III's on coccyx. Placed resident on an alternating pressure relief Keen air mattress and within 10 days resident's wounds are completely resolved. I don't know if this is a God thing, or a great mattress, or both! I know it's a GREAT BED!!  
 Mary H, RCM, PORTLAND, OR

**Product Description** **HCPC E0277**

The SanoAir Mattress by Keen is the Cadillac of air mattresses at the price of a Ford. With 20 separate air cells that are vented for true air loss and side air bolsters, this mattress handles high-risk individuals with ease. Other features include a quick inflate and deflate CPR plug, with a 2" convoluted CPR foam pad. Also included is a heavy-duty 4-way stretch top cover, which is vapor permeable and completely removable and washable. The microprocessor controlled blower unit is quiet and doesn't produce heat. It features a dual mode capability with a cycle time that can be adjusted from 3–20 minutes in 1-minute increments. It also has 10 different pressure settings with a "lock out" feature to maintain caregiver settings without accidental interruptions.
